Professional Firms.

Audit, accounting and taxation services

Informed and pragmatic advice

A complex tax regime and changing legislation have placed increased demands on professional practices. Our Professional Practices team can help.

Risk and regulatory pressures are high, making it vital to work with the right strategic partner. Our professional firms team deals with a broad spectrum of clients from sole practitioners to some of the largest professional practices in the area.

How we can help

As well as providing compliance services, we regularly advise professional services businesses on the following:

- Structuring advice
- Profit & cash flow forecasting
- Financial efficiency reviews
- Working capital considerations
- Remuneration planning
- Acquisitions, mergers & valuation advice
- Property ownership
- Risk management & controls reviews

We work with a range of professional practices including:

- Solicitors
- Chartered Surveyors
- Estate Agents
- Patent Attorneys
- Medical Practitioners
- Veterinaries
- Architects
- IFA's

What our clients say

Hewitsons Solicitors

"We have used PEM as our Accountants and financial advisors for many years. The relationship works really well. Kelly, Sean and the rest of the PEM Team know us so well but never take us for granted. As a firm, PEM remains independent but has invested for the future and show themselves to be forward thinking and alive to the challenges that professional firms of our kind face."

Adam Harrison Solicitors

"PEM provide invaluable advice and input with future planning for the firm, including succession planning. Their Solicitors Account Rule annual audit is extremely thorough and comprehensive and they always take the time to talk through their findings. I know that if ever I have a finance query as Managing Partner and COFA that PEM will be on hand to assist promptly with advice and support."

Edmondson Hall Solicitors

"PEM have demonstrated a great understanding of our business and consequently the team are always very clear in their advice which enables us to execute what are often complex decisions."
